

# Christmas Gift Catalogue

"Because of the water projects your gifts are providing, more than 3,500 people in these three villages will, at last, have access to clean drinking water in their village."

—Jose Oliveira,  
Inter-Senegal Mission Director

### Clean water for Indian families

In West Bengal, the ground water drawn from shallow wells has been contaminated by arsenic. Families are now depending on other sources of water, which are often just as dirty. Your gift will drill a deep tube well that will serve about 100 people, and help local Christians demonstrate the love of Jesus to their village.

### Village well in West Africa

In West Africa, many families must draw water from polluted streams. The dirty water makes people sick, and threatens the lives of young children. Your gift will help our partners in Liberia or Nigeria drill a new well for a village and offer life-giving water to an entire community and surrounding villages, serving 1,000 people or more.

### Help build a water system

In many villages in Senegal, women and children must walk miles each morning and evening to collect water for chores and drinking. Unfortunately, all this hard work often does not even yield water that is clean. Your gift helps build a water system and provides a family with clean water in their own village.

### Clean water and sanitation

In the remote Quechua communities high in the Peruvian Andes, families often lack access to clean water and adequate sanitation facilities. As a result, almost three quarters of the residents are chronically ill. Your gift provides clean water, a new latrine and hygiene education for one Quechua family in Peru.
